Section 11-1: The Work of Gregor Mendel The principle of dominance states that some alleles are dominant and others are recessive. When each F 1 plant flowers, the two alleles are segregated from each other so that each gamete carries only a single copy of each gene. Therefore, each F 1 plant produces two types of gametes-those with the allele for tallness and those with the allele for shortness.

Chapter 1 The Science of Biology 1-1 What Is Science? Science is an organized way of using evidence to learn about the natural world. Scientific thinking usually begins with observation, which is the process of gathering information about events or processes in a careful, orderly way. The information gathered from observations is called data.
